

Did you know that almost 20% of bacteria in our waterways comes from pet waste?

Here are some tips to keep waterways clean:

- Keep a supply of bags near your dog leash; tie bags on the leash if you don't have a pocket or pack.
- Reuse old bags.
- Purchase special bags where pet supplies are sold.
- Long-handled "pooper scoopers" available at pet stores make it easier to pick up your dog's waste without stooping over.
- NEVER put pet waste in a storm sewer - it will go directly into a stream.
